Summary

A software engineer with 3+ years of experience in Java Spring Boot development, adept at designing scalable microservices architectures. Proficient in Hibernate, AWS cloud integration, and RESTful API development. Skilled in delivering high-quality software solutions with a focus on scalability, performance, and security. Strong problem-solver and a collaborative team player in fast-paced environments.

Skills

Programming: Java, C, C++, Python
Frameworks/Tools: Spring Boot, Hibernate, Git, Azure DevOps, Bitbucket, Jira
Databases: SQL, MSSQL, PostgreSQL
Cloud: AWS, OpenShift
Web Development: HTML, CSS
Other: Microservices, REST API, MS Office

Work Experience

Senior System Associate
Infosys LTD, Bangalore | May 2023 – Present

- Developed 12 Spring Boot-based microservices, improving system performance by 30%.

- Managed OpenShift deployments, enhancing uptime by 15% and cutting cloud costs by 10%.

- Resolved 50+ code issues, boosting software efficiency by 25%.

- Conducted thorough code reviews, identifying bugs and saving over 100 debugging hours.

- Mentored a team of three, improving quality and reducing errors by 30%.

- Documented OpenShift deployment processes, halving new hire onboarding time.

System Associate
Infosys LTD, Bangalore | December 2021 – April 2023

- Enhanced components for a banking client, reducing data latency by 20%.

- Built 8 microservices and batch jobs, increasing processing speed by 15%.

- Achieved 90% test coverage with 100+ JUnit cases, cutting testing time by 25%.

- Optimized PostgreSQL queries, reducing execution times by 40%.

- Streamlined deployment workflows, halving release cycles with IDP and AWS.

- Improved project tracking and planning accuracy through effective Scrum participation.

Education

Bachelor of Science (B.Sc. Hons.) – Mathematics - 2021
MRS. KMPM Vocational College, Jamshedpur | Graduated with 82%

Certifications

- AWS Certified Cloud Practitioner
